Selling 150 Simmental, SimAngus & Angus Bulls

BIG SKY GENETIC SOURCE
Bull Sale
Welcome to our 44th Annual Production Sale.

This past year certainly presented some trials. Last winter is one we all want to forget. Spring was slow to come, but when it finally arrived it was cool and wet, made for tougher calving, although it also set our country up for a very nice hay and grain crop year. The grass was good to excellent, so many ranchers had a great year to get their grass back in shape after a year of drought. The upside to our year was that the cattle markets held and most sold their calves as good if not better then the past year. Our bull pen is loaded with a set of bulls as even as we have ever offered. They are a strong group, thick, easy keeping, and moderate in size. We have a few new sire groups that really impress us.

Our motto “the Cowman Comes First” is very evident in these bulls. Uniformity in kind and type is outstanding. Cows with excellent udders and the ability to withstand extremes in weather are represented throughout the whole offering. Each and every bull selling has been put through our strict high standards. We believe that everyone of them will add value to their new owners.

This past year we have spent over $30,000 DNA testing our entire cow herd to better their EPD accuracies and parentage, verify every cow. We also identified the cows for homozygous black. This was a big project that took a lot of time and money to accomplish. We feel this shows our commitment to offer seedstock that will better fit all segments of our industry.

We did not creep any of the bulls, and we have set them up on a low mega cal, high roughage diet to condition them into sound breeding bulls. We worked with Hubbard Feeds and continually monitored feed quality and kept the gains on the bulls at a level that developed them into sound breeding bulls that should keep on growing, and not fall apart when in use. Our cow herd is managed like most commercial cowman run theirs, they are run out and grazed with no extra feed for as long as the grass holds out.

As always, we will keep the bulls free of charge and give them a breeding soundness exam around the first of April. We will deliver them to you at no charge on bulls that sell for $3,500 or more, in most cases on all bulls within a reasonable distance and selling price. Our guarantee is a 100% purchase price on any bull that has a problem, except for negligence or death from accidental or nature caused. If your bull develops a problem, we want to know, and we will make it right.

We welcome your ranch visits anytime you are in the area, stop in we will be happy to show you around. We want you to know that we appreciate your business and are humbled to have you as our customers and friends, and are here to serve your needs. If you have any questions, feel free to call, we will try to answer them to the best of our ability. On sale day come hungry, we will have a free lunch that will stick to your ribs.

Thanks so much.

Bill & Darlene, John & Alicia,
Bob & Virginia, Harry & Elaine

RANCH LOCATION
The sale will be held at the ranch located south of Wibaux, Montana.

From Beach, North Dakota, take Exit One, turn left, go past both Truck Stops, approximately 1 mile to the first stop sign (please note the 4 way stop), turn right at 4 way stop, go 7 miles west, then turn left on Custer Trail Road and go 2 3/4 miles, sale location is on the left hand side of the road.

From Baker, Montana, take Highway #7 north, approximately 35 miles, turn right on Red Top Road at mile marker 71, watch for big yellow Ranch sign, go 1 1/2 miles east (Custer Trail), turn left, go 1 1/4 miles, sale location is on the right hand side of the road.

CATTLE VIEWING
We welcome your visit anytime that you are in the area. Please call before you come, so that we are here to show you around.

ULTRASOUND
Please Note: The spring born bulls will be ultrasounded and data will be available sale day, or as soon as available.

TERMS AND CONDITIONS
As recommended by the American Angus and American Simmental Associations. cattle will only be released from the sale after they have been settled for. In no instance, will any cattle be allowed to be loaded for shipping without full settlement. EPD’s listed in catalog are new Spring 2018 numbers, please note that EPD’s may change from time sale catalog is printed, until registration papers are transferred.

FEEDING ARRANGEMENTS AND DELIVERY
For bulls selling for $2,500 or more, we will offer free keep of your bull until the first of April. At that time we will semen test and give your bulls a breeding exam and deliver them free of charge up to 500 miles. For bulls that sell for less than $2,500 we will feed them and have them semen tested for $150 due on sale day. We will help in delivery arrangements. The bulls will be delivered to your ranch or in some cases when there are multiple owners of cattle on the truck and there is a need to unload and sort cattle, we may ask that you meet us at a central location that is convenient to both parties. For cattle selling over 500 miles away, we may have to hire a trucking firm to help with delivery, if so, we will guarantee delivery cost not to exceed $300 per bull. In most cases, we will deliver them ourselves, but occasionally we will put the bull on a commercial truck that is reputable and conscientious. For purchases of cattle a long distance away, we ask that you be flexible on delivery dates in case we have the opportunity to send your bull your direction earlier than April 1st. When purchasing a bull from Begger’s Diamond V Ranch, we take responsibility in delivering a healthy, breeding bull. We will take responsibility of injury or death loss while the bull is on our ranch. Responsibility of your bull purchase begins when he reaches your ranch or delivery point. We guarantee buyer satisfaction. If you have any problems with your bull’s ability to breed and settle cows, let us know so we can make it right. We suggest that you insure your bull against death or injury. We cannot guarantee them against an act of God or sickness that develops while he is in your control. We do guarantee our cattle to be healthy sale day.

ANNOUNCEMENTS
Announcements made sale day and from the auction block during the sale take precedence over printed material associated with this sale. Anyone attending this sale attends at their own risk. Begger’s Diamond V Ranch or any of the sale force will not be responsible for any personal injury or loss while attending this sale.

HEALTH AND VACCINATIONS
The Bulls were vaccinated at branding with Pyramid 4, with Presponse and Vision 7 with Somnus, and again at weaning, they were poured with Ivermectin on September 3 and again in December. They were tested free of BVD.

SALE ORDER
We will sell lots 1 through 20, then fall bulls, then go back to lot 21 following catalog order, selling Angus bulls last.

SIGHT UNSEEN PURCHASES
We guarantee all sight unseen purchases. Call ahead and we will go over the bulls and try and match you up with a bull that meets your needs. You can leave a bid with us or any Sales Rep, or by phone, whichever is convenient for you. We know our cattle and strongly recommend that you call and visit with us on all sight unseen purchases. Sight unseen purchase policy does not apply if you are selecting your own bulls without our consultation or the help of our sales reps.

INTERNET
Our sale will be broadcast over the Internet on DV Auctions. If you cannot attend the sale in person we have set up this method so you can view the sale and make a purchase. Make sure you pre-register with DV Auctions before sale day. We likewise will offer phone service sale day for those who prefer making their purchase that way.
Our goal is to offer the best when it comes to total profitability. When we select our genetics, we consider all the avenues in the beef business. First of all we look at what will keep you the cow-calf man profitable. Things such as calving ease, fleshing ability, udder quality, disposition, and phenotype, along with mature cow size, and their ability to raise a calf that is worth more at sale time, and is efficient. Producing cattle that the feeders and packers desire. How do we select our genetics? We use EPD's, dollar based Indexes such as API and TI and eye appeal, along with the ability for an animal to be productive, wean a satisfactory calf, breed back on time, and have the ability to use the feed source that our environment provides. We try to run our cows in the same way that most commercial outfits run their cattle and the cows are still in excellent condition. We believe that the API is a valuable tool to consider, but feel that it is simply a guideline, and like all EPD's and dollar indexes, should be used as a way to split the difference between a choice of 2 animals that appear to be alike. It is just one equation that needs to be considered along with an animal's performance, eye appeal, and ability to survive in its environment. When you purchase your seedstock, take the time to look at your suppliers' cow herd, what do they look like, are they functional, what is their udder quality like, what is their frame size, and do they calve easy, stay in shape, and do they produce a high percentage of their body wt. We consider it all and believe we offer a good solution and end point.

Come take a look, we will have the majority of our cows available to observe, so you can see for yourself what you can expect your cowherd to look like if you use Begger’s Diamond V Ranch genetics.

2018 was a busy year, we were shorthanded, so summer and fall went by and we didn't get any cow/calf pictures. The pictures we took were taken by us, no fluff, no puff, in their everyday clothes, but most of all, no custom photographer that alters the pictures. There is so much of that being done today, that when you get to the sale, the pictures don't match the cattle. We hope that you recognize us to be your seedstock supplier, that presents the cattle as they are with no hidden secrets. The bulls will be videoed and online by mid January. It will show the bulls again with no extra fitting, just out of the pen in their everyday clothes.
THE SPRING BULLS
This set of bulls maybe the evenest set ever offered, they show our commitment to make our worst cow as good as our best. These bulls are quiet dispositioned, moderate framed, thick made, and maternal. They are bred to calve easy and perform. Cow structure and size along with udder quality is present. They are bred to compliment a crossbreeding program that is profit driven and designed with common sense.

This is possibly one of the best Data sons, he is a powerful eye appealing powerhouse. He is an eye catcher and is one that will be a favorite come sale day. If he follows his dam’s footsteps, he will consistently sire a powerful set of calves. His sons will weigh heavy and his daughters will make excellent cows.

This bull is one of the top performance bulls in the whole group. He came off the cow at a whopping 870 pounds in September, the heaviest actual weaning weight. His young 4-year-old dam certainly did her part. He is sired by one of our past sale bulls, as 2 Capitalist sons and a Top 10 son got in with the cows. We did not blood type to see which one sired him, but by his body style, I believe he is by the Top 10 bull. No matter what, he is a rock-solid bull that will sire a little extra frame and length. His API and TI indexes are low because of his sire uncertainty, so I see no accuracy in them, because they gave him a zero on the sire side. What I do know, he is one of the top picks in over 150 bull calves in his contemporary group. If you like performance cattle with eye appeal, here he is.

This bull is definitely a favorite. He is so complete, very deep sided, big topped and heavy muscled. From day one, we knew he had the potential to be our kind and one of the best. I feel he is so right for the cowman that wants it all. Calves that wean heavy, cows that are moderate sized and easy to look at. He will make them fancy and full bodied. Very good disposition to boot.

Here is a moderate thick made bull that is out of a young Capitalist daughter that stems from one of our top producing cow families. He should sire moderate, thick, deep bodied calves that come easy, grow fast, and stay the right size. His daughters should be top notch sensible sized cows with plenty of cow power. Udder quality will be the best.

This Data is a big stout cow that knows how to raise a big calf. Your calf buyers will like his kind. He will sire them big, fancy and in demand. His daughters will make excellent cows, with very neat udders.

This is a high-octane Unified son that will certainly draw some attention sale day. A very acceptable birth weight and a scale crushing weaning weight outlook of a 2-year-old dam. We sure like the Unified calves for their clean eye appealing profiles, cow power runs through the veins of this herd bull prospect. Note he is a little more nervous than most, but not crazy.

A very high performing Aviator bull, he certainly put a lot of good in this bull. He used him to sire capacity and completeness, and he certainly did that. Look at this big 741 205-weight to make him index at 107. His dam has a very nice udder.

This is a high-octane Unified son that will certainly draw some attention sale day. A very acceptable birth weight and a scale crushing weaning weight outlook of a 2-year-old dam. We sure like the Unified calves for their clean eye appealing profiles, cow power runs through the veins of this herd bull prospect. Note he is a little more nervous than most, but not crazy.

A moderate framed 3/4 blood, out of a sensible sized dam with a super udder. His sire was our pick of the entire bull pen 2 years ago. His granddam is a powerhouse female that consistently brings a top calf in. In fact, her heifer calf by Range Boss is our pick out of 175 heifer calves that we weaned this past fall. A bull with a ton of volume.

This is one of the youngest bulls in the offering. He came very light at birth and is the lightest birth weight son of Blue Print. His young 3-year-old dam already raised a $10,500 son as a 2-year-old. This young bull being one of the youngest was one we noticed but just thought he was ok. All of a sudden he was there, very correct in his design, and he has a lot of eye appeal. He will be a moderate sized herd bull that is easy keeping, and easy on the eye, he posts excellent performance. Remember he is young, don't miss him. He is going to sire a lot of bang for the buck.

A very nice thick made bull. He is out of a 3-year-old dam that is heavy milking and has a picture-perfect udder. This bull is un-registerable, because his sire is one of our past bull sale bulls. We had 3 get out with our 2-year-old heifers, and she got bred. 2 were Connealy Capitalist sons, and one was a son of Top 10. We believe his is out of one of the Capitalist sons by the way he is built. No matter, what, he is the right kind, thick, deep, easy keeping, and good. His EPD profile is a little flat because of his sire uncertainty, so they gave his sire a breed average. So, don't put much selection pressure on his EPD's, for that reason. If you like big volume cattle that are easy fleshing, you will want to own him.

Another very good Data son out of a young dam that goes back to Networth. She is an excellent uddered cow with eye appeal and fleshing ability. I would take a whole herd of her kind. The Data calves have been very easy to like and will sire daughters that will be the envy of all that see them.

**CCR MS 4045 Time 7322T**  

---

Here’s a Cowboy Cut son that is fancy and easy to appreciate. He was a heavy weaning bull that has grown into a flashy eye-catching bull prospect. His cow family is one of our strongest, his granddam was the pick of our entire herd going to Doug Bichler and Chris Nickelson. His great grandam is the dam of our 70D herd bull and the mother of our favorite heifer in the replacement heifers.

**RBS Miss 563**  

---

A purebred Boise, out of a 2-year-old heifer. His cow family is one of our favorites. He will sire calving ease, with good performance. His daughters should be the keeping kind, sensible sized, easy fleshing, with great udders. Use him on a wide selection of cow type, he should even them up and make them very desirable.

**Lot 59**

**Out of a 2-year-old dam, he posted a very light 77 lb. birth weight, ranked as one of the 5th lightest birth weights in our herd. We goofed and turned him out in the wrong pasture, as his dam was in another, so he got orphaned in early June. This made for a much lighter weaning weight than he would have had, but he learned how to rob, so he still weaned at 653 pounds, not bad. There could be a lot more bull under the hood than what his stats say.**

When it comes to cattle that do everything right, this bull’s dam is certainly one of them. Take the time to analyze this bull, he could be the sleeper of the whole sale. He lost his dam at about 2 months of age. We eventually found a cow to spike him on, but she was not the best. This bull’s full brothers have twice been our Lot 1 lead off bulls, both selling very well. Don’t overlook him, he should have been and most likely would have been one of our top performers if his dam raised him. He is very gentle.
This is the other bull calf that we swapped into the wrong pasture, so he was orphaned in early June. I guess I need to pay more attention or need new glasses. His 205 weight was the other big eye appeal. This bull will go, the Cowboy Cuts are a favorite sire group. We really appreciate the thickness Ignite to go, the Cowboy Cuts are a favorite sire group. This is a nice moderate framed Cowboy Cut bull, he will put some milk and cow power in his daughters. The Cowboy Cut calves are very clean in their makeup. No matter where you go the Cowboy Cuts are a favorite sire group.

FALL SIMMENTAL BULLS

THE FALL BULLS

This set of fall bulls were sorted hard to insure soundness, fleshing ability, and structure, they were never crept fed. They ate what the cows ate all winter long. They did better than we could have ever expected, as their weaning weights are exceptional. We weighed this set of bulls on Feb, 20th, and this was a little younger than normal, usually mid March or early April. This did enhance their 205 wts quite a bit. We decided to wean them early because of the bitter cold hard winter. We feel that their 205 wts are higher than if they were weaned 30-45 days later. What we've notice year in and year out, the younger they are, the better their 205 wts seem to be. Don't dwell on the big wts, but notice how they indexed among their contemporaries, I feel that would be accurate. With all being said, they are still high performing bulls that will definitely sire calves that are excellent performance cattle.

The bulls were summered on grass with lick tubs we did not push them at all. We brought them back to the corrals mid October to get them conditioned for the sale. We elected not to push the bulls and run an ADG test, instead we fed them a low mega cal growing diet to enhance their longevity. We weighed them on December 22, and included their actual wt in the catalog. These bulls are a very strong athletic group that should be ready for heavy service. As you look through these fall bulls, they will be penned in 4 groups. The first pen will be the larger framed bulls, they will also be the heaviest actual wt, they will sire a little more frame with very good performance. The next pen is a very stout, big middled set of bulls that will sire more moderate framed cattle, will add volume, and fleshing ability. Pens 3 & 4, will likewise be very similar, all 4 pens are excellent performance bulls that will sire cattle that weigh up at weaning. They are designed to sire cattle that will withstand the extreme weather elements they were raised in.

What a powerful baldy bull, long deep and thick, perfect disposition and uniquely marked. I wish I had a whole pen of these 18-month-old baldy bulls like him. His is a scurred bull that we removed last fall, but if that's a hole, it might be the only one he has. Whoever ends up with him will own one of my favorites.

THANK YOU!

I would like to say thanks to all our present, past, and new customers. We don't take your choice of doing business with us lightly. In today's fast paced world it is at times hard to make all the contacts we should. Always remember, if you ever have a problem with your purchase, call, we need to know. As always we will have a bite to eat and some refreshment after the sale. Please stay around a while if you can. It is a time that we can get to know each other better. Thanks so much for taking the time and choosing us to be your seedstock supplier. It means a lot.

This Capitalist grandson is out of one of our high selling bulls a few years ago. We sampled him that year, got along very well. The next year I brought him back home to use in our fall program. I should have just brought him back for good, but he wasn’t for sale. When you analyze these sons, you will know why. Not only out of a top sire, but a superb dam. She is very complete, very easy fleshing, deep bodied. His dam has a good udder as you can find. I expect great things out of this guy.

If you are looking for a purebred Simmental bull that is good enough to go purebred or commercial, here is one that’s loaded with herd bull look and performance. He is very eye catching, thick and deep as a whale and well designed in his shape. His 10-year-old dam is very consistent. We don’t flush cows but if we did, this cow would definitely be in the donor pen. We have tossed it around hard and probably should be leaving this bull in our own herd bull battery. We will retain the right to collect this bull if we desire at a later date. All kidding aside, he is one of our elite.

A good performing Capitalist grandson. When you find Capitalist in a pedigree it just makes the bull stronger. I am a big fan of him, because he sires fleshing ability and quality consistently. His daughters make great cows, the 4B55 cow just adds to his quality.

RETIRED SEMEN INTEREST IN BULLS

Every bull sells in his entirety, we know that when you pay a big premium to own a herd sire, that when a breeder keeps a share, it’s hard to recoup your investment. We do retain the right to collect 100 units of semen at our expense and your convenience for within herd use only. In case an AI stud buys the bull, we reserve the right to buy semen at cost as if we were a shareholder, but will not share in any revenue received.

Could be the calving ease specialist you need for a set of big heifers or young cows you want to safely add Sim influence. The Night Ride calves come small at birth and become moderate sized thick bodied cattle that can withstand the tough times. Out of a 2-year-old heifer that calved out on the range with no problems.

A calving ease bull out of a 2-year-old heifer. If you need a bull that will sire them lighter at birth, here is a good choice. We have calved over 50 calves by Nightride and have never wanted to protect at calving. He is out of a 2 year old heifer. Note that he can be a little nervous when alone in the bunch you will never notice it, but one on one you need to pay attention.

Possibly the lightest birth weight bull in the fall bunch, only 65 lbs at birth, with a very respectable weaning weight. This bull would be a good choice to use on heifers or cows you want to protect at calving. He is out of a 2 year old heifer. Note that he can be a little nervous when alone in the bunch you will never notice it, but one on one you need to pay attention.

This is the bull that posts the heaviest weaning weight of all the bulls in the sale and is one of the youngest fall born bulls. It seems like when they are younger, they get a better 205 adjustment. I think his 205 weight is a little better than what it should be. Although I will tell you, he is out of a very heavy milking productive cow. No matter how you evaluate it, it still takes cow power to produce calves of his caliber.

---

**SUGGESTED GUIDELINES FOR USING YEARLING BULLS**

We are firm believers in the use of yearling bulls and feel it is one of the best years of their lives. It is a time when they are easy to manage and their only concern is breeding cows. We have found that yearling bulls that are managed carefully during the second year of their lives, not only do well, but they will perform better, over time. Below are some suggested guidelines for the care of yearling bulls.

Upon delivery to your ranch, keep yearling bulls separate from older bulls and feed them a maintenance ration of 5-8 pounds per head of grain and free choice hay. Reduce the amount of grain fed gradually, so that bulls are on straight hay or grass 2-4 weeks prior to the breeding season. Where possible, try to limit the bulls to 45-60 days of pasture service the first year. At this time or as soon as possible, remove the bulls and put them in separate pastures with plenty of good quality grass. It is best to feed yearling bulls separate from older bulls until after their second breeding season. This allows them to achieve the growth and strength to compete with older bulls for feed and space. You will see the benefit of a little added cost and care of feeding a yearling bull by probably two or three more years of service from a well managed and healthy bull.
THE ANGUS BULLS

Only 11 Angus bulls this year, but there are some high quality bulls in this group. No matter what you are looking for, there are seedstock quality cow bulls, and a few heifer bulls that will sire more than just a live calf, weaning wts and performance with cow power represents this set of bulls.

BDV Examiner 750E

Black • Homo Polled • Purebred Angus
AAA# 19056108 • Tattoo: 750E • BD: 8/30/17
Act. BW: 85 lbs. • Adj. WW: 891 lbs. • Ratio: 115
Act. YW: 1460 lbs. • SC: 37

An absolute herd bull standout, you will travel far and wide to find an Angus bull with this much volume, capacity and fleshing ability. We have been seriously considering retaining this bull for a herdsire. His dam’s average weaning index is 111, she has been bred to both Angus and Simmental sires with excellent results. I believe this bull is one of the elite Angus bulls to sell this season.

BDV Evolve 754E

Black • Homo Polled • Purebred Angus
AAA# 19056112 • Tattoo: 754E • BD: 9/20/17
Act. BW: 82 lbs. • Adj. WW: 813 lbs. • Ratio: 105
Adj YW: 1348 lbs. • SC: 39

This Capitalist grandson mirrors his sire very well, thick, deep, and well balanced. His special Focus dam is absolutely a gorgeous cow, very easy keeping and well put together. Her udder is as good as it gets on a scale of 1 to 10, she’s a 10. I believe this bull follows the type and kind of 750E, I feel he is at herd bull status, very complete from top to bottom.

BDV Energizer 751E

Black • Homo Polled • Purebred Angus
AAA# 19056109 • Tattoo: 751E • BD: 9/5/17
Act. BW: 84 lbs. • Adj. WW: 713 lbs. • Ratio: 92
Act. YW: 1242 lbs. • SC: 39

This is a real useful Impact son out of a very good uddered dam. This bull will sire clean made cattle that are easy to sell, and his daughters will be the keeping kind. His calving ease is very good, and his daughters will be better. A very complete bull that will help your bottom line.

Weeks Full Power 1715

Black • Homo Polled • Purebred Angus
AAA# 19049873 • Tattoo: 751E • BD: 9/5/17
Act. BW: 84 lbs. • Adj. WW: 700 lbs. • Ratio: 104
Adj YW: 1348 lbs. • ADG: lbs. • SC: 39

This a coming 2-year-old Full Power son that we used on a few registered cows this past summer. We really appreciate his type and kind, very long bodied, deep sided, and eye appealing. The Full Power cattle are performance cattle that put extra performance and style in their progeny. His daughters should be very strong maternal cattle.
**BDV Cowboy Up 801F**
Black • Homo Polled • Purebred Angus
AAA# 19296313 • Tattoo: 801F • BD: 2/20/18
Act. BW: 78 lbs. • Adj. WW: 723 lbs. • Ratio: 104
Adj YW: 141 lbs. • ADG: 4.36 lbs. • SC: 34

This is quite the bull, born a light 78 lbs, and weaning off at 727 lbs. He was the highest ADG Angus bulls in the entire group. Out of the $350,000 HA Cowboy Up, that was the sale highlight of Hinmans and of the Nation. He is out of a cow family that excels in performance, and udder quality. I feel he is heifer safe for the cowman that watches his heifers, but still demands more than heifer bull performance. He should sire excellent daughters as well.

---

**BDV Active Duty 806F**
Black • Homo Polled • Purebred Angus
AAA# 19296065 • Tattoo: 806F • BD: 2/25/18
Act. BW: 84 lbs. • Adj. WW: 702 lbs. • Ratio: 101
Adj YW: 1350 lbs. • ADG: 4.05 lbs. • SC: 37

Here is a herd bull deluxe, he is a full brother to our high selling Angus bull 2 years ago, expect the best with this bull. Active Duty bull certainly puts some performance in his sons and daughters. They are long, deep sided cattle, with the ability to convert grass to beef, we are extremely pleased with them. This bull's dam is a daughter of Pioneer and she works hard and brings a powerful calf in year after year.

**BDV Granite 805F**
Black • Homo Polled • Purebred Angus
AAA# 19296119 • Tattoo: 805F • BD: 2/23/18
Act. BW: 85 lbs. • Adj. WW: 729 lbs. • Ratio: 105
Adj YW: 1337 lbs. • ADG: 3.8 lbs. • SC: 36

Here is a Granite son out of a 2-year-old dam. This bull could be used on bigger heifers if you watch them, he will sire cattle that fit all segments of the industry. He weaned 2nd heaviest at weaning and is performing well on test. There is very good performance and cow power in this bull's pedigree.

---

**BDV Impact 810F**
Black • Homo Polled • Purebred Angus
AAA# 19290343 • Tattoo: 810F • BD: 3/31/18
Act. BW: 82 lbs. • Adj. WW: 746 lbs. • Ratio: 108
Adj YW: 1294 lbs. • ADG: 4.05 lbs. • SC: 35

This is a very good performing bull with a 108 ratio at weaning. Out of a cow that has weaned 4 calves with a 109 average weaning index, she should earn her Pathfinder status. We believe that BDV Impact 410B is one of Capitalist best sons, and his dam was one of the elite Angus cows in our herd and possibly the Angus breed.
Listed below are the units ASA EPDs are expressed in:

**All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

**Back Fat (BF):** Inches of backfat.

**Birth Weight (BW):** Pounds of birth weight.

**Calving Ease (CE):** Percent of unassisted births when used on heifers.

**Carcass Weight (CW):** Pounds of weaning weight.

**Carcass Marbling (MAR):** Marbling score.

**Carcass Yield Grade (YG):** Yield grade score.

**Carcass Yield (CY):** Pounds of birth weight.

**Conception Rate (CR):** Percent of cows that conceived.

**Dam daughters (DAM):** Daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.**

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. Using API and TI: First, determine which index to use; if you’re keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type bull, you can quickly figure a bull scoring +10 for API is worth an extra $6,000 over a+50 bull if both are exposed to 30 cows over 4 years ($50 diff. x 30 hd. x 4 yr. = $6,000). A percentile-ranking chart is required to determine where a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type bull, you can quickly figure a bull scoring +10 for API is worth an extra $6,000 over a+50 bull if both are exposed to 30 cows over 4 years ($50 diff. x 30 hd. x 4 yr. = $6,000). A percentile-ranking chart is required to determine where a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type bull, you can quickly figure a bull scoring +10 for API is worth an extra $6,000 over a+50 bull if both are exposed to 30 cows over 4 years ($50 diff. x 30 hd. x 4 yr. = $6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and $ indexes, visit www.simmental.org.
SIMENTAL REFERENCE SIRES

QB BLUE PRINT
Blue Print has certainly sired a solid group of calves, both bulls and heifers that made the sale and replacement pen. His calves are born in the 90-95 lb range, they are very easy to spot, and identify as his. They are thick topped, deep sided, and deep rear quartered. His calves have that extra good look with excellent performance. He will sire pay weight and easy keeping cattle that are performance driven. I think every heifer made the replacement pen and his sons made the bull pen. There were several breeders who used him with excellent results. Everyone that bred to him say they have never used a bull with this much consistency, very unique, and useful.

RBS BOISE
We found Boise out in Minnesota, he was a sale highlight for Ruffy Brook Simmentals. He certainly caught a lot of attention and was used heavily throughout North Dakota, Minnesota, South Dakota and Montana. Reports are calving ease, is heifer safe, and he sires them thick and deep. Some say he sired their top calves, others say you need to use him on your big cows. We find that he sires very good calving ease, and adds fleshing ability. We think his daughters will be a great addition to our cow herd. He sires cattle that are moderate and easy keeping.

QB DATA
This is a very good ½ Sim-Angus son out of the SAV Bismarck bull, and a Tanker dam. He was our pick out of 5 full embryo brothers. We are very pleased with his performance from calving, weaning, and onto yearling. These cattle are the ranchers’ kind, fancy, clean made, easy keeping, and his daughters look like they will make excellent cows. He sires cattle that wean heavy and will stop growing to make sensible sized cows that wean quality calves that weigh up at weaning.

QB IGNITE
We were in search for a baldy bull with no white on his underline and of top herd bull quality. When we found Ignite we knew right away we needed to own him. Ignite sires calves that are thick, deep bodied, and easy fleshing. Although he only has a small star on his forehead, no other white, he sires bald faced calves with minimal white on the belly. About half of his calves are solid black out of solid black cows. We are very pleased with his first calf crop. Ignite is very easy going with a great disposition, he is probably our easiest fleshing herd sire. He is a great addition to our program.

BDV CORNERSTONE 194B
Cornerstone is a truly easy keeping, very quiet dispositioned bull we retained to use in our herd. He was kept to replace his sire Torque, our Mytty in Focus Angus bull that had excellent acceptance year after year. Cornerstone is a Sim-Angus ½ blood that sires them moderate in size, and as thick and deep sided as you need. We feel he is a true performance sire that will keep your mature cow size in check.

TJ MAIN EVENT
Main Event is a high API bull that we used on our virgin heifers. He certainly calved easily, his calves are clean made, quiet cattle, that are easy on the eye. His EPD’s say he ranks in the top 1% for weaning and yearling growth. I do not believe that he will stay at that level. We are certain he is a calving ease bull with eye appeal and class. His daughters will be moderate size and fancy. Main Event looks to have excellent carcass traits.

TNT UNIFIED
We used Unified on a large number of heifers and he worked very well. His calves were born small and vigorous, he sires calves that are very clean made and still have an easy fleshing appearance. We think his daughters will be very nice cows that are easy to appreciate. We have retained a son that shows excellent promise as a calving ease sire with top performance.

BDV DEMAND 70D
This Unlimited son is out of a top Dual Focus cow that has produced many of our top calves, both heifers and bulls. We retained him to sire the best when it comes to cattle that perform at a top level, and yet stay sensible sized with top maternal qualities. His sons are the cowman’s kind, his daughters will be some of the best.

CCR COWBOY CUT
Cowboy Cut is a bull that has become very popular across the nation. His calves are fancy cattle that are medium framed and are classy and easy on the eye. We used him on cows with good results. This is his third calf crop born here. They have been well accepted in the post. We think that his daughters will be shapely, clean made cows, with nice udders. Use him to add style to those moderate deep bodied shapey cows.

LRS TOP 10
We have used Top 100 on heifers and cows alike. He is a calving ease Specialist, that sires calves with an excellent EPD profile. His calves grow well and have plenty of frame. We have found him to be a sire to use on cattle that need some more frame. The Top 10 cattle were well accepted in previous sales. He is a big spread bull with top carcass EPD’s.

LRS RANGE BOSS
We have used Range Boss with excellent results, his calves are deep bodied, easy fleshing cattle that are moderate in size, yet he sires cattle that excel in performance. We are very excited with his daughters, as they look like cattle with superb fleshing ability. His sons are scale crushers, you will want to own one.

TNT PRIDE
Pride was our choice out of TNT’s sale, he was the sale topper. Without a doubt, the most sought after bull in the sale. We are very happy with his calves, they are excellent performing cattle with a lot of class. His sons were very popular in our past sale, his daughters make the replacement pen with very few outs. We lost Pride due to an injury, but plan to use him heavily as an AI sire, he does everything right.

ANGUS REFERENCE SIRES

CONNEALY GRANITE
We chose Granite to use in our AI program to use on heifers. He is very popular in both the seedstock and commercial world. Granite calved very well, and we used him on both Angus and Simmental females. We are pleased with the outcome.

CONNEALY CAPITALIST
Without reservation, he is still our choice of the Angus breed. His calves are born easily and grow very well. What he does better than any Angus bull we have ever used, he puts volume and rear ends in his progeny like no other. His calves wean heavy, but mature out to be moderate easy fleshing cattle. His daughters are deep, bug volume cattle and have excellent udders.

BDV IMPACT 410B
Our Capitalist herd sire that is out of a flawless Travler 004 daughter. He sires them thick, heavy at weaning, with added fleshing ability and capacity. He sires excellent maternal qualities. His dam and granddam were some of the top Angus cows we have owned, and possibly in the Angus breed.
Begger's Diamond V Ranch
